

Attendance Assistance Program

MAY 2024

We've entered the home stretch. End of year activities, assessments and also lots of fun is happening in classrooms this month. There is still learning to be done even with all the other fun! Make it a priority to finish the year with good attendance. It is easy to get lazy and not check book bags, get things ready the night before, and oversleep because the end is in sight. However, keeping up with your routine and making school a priority re-enforces not only the importance of school, but it helps students feel included by being able to participate in all of the year end activities. It is also important to check in with teachers and make sure that your student is caught up on all homework assignments and ready to promote to the next grade level.

May is also a good time to talk to your student about any transitions that may occur at the end of the year. Will your child move to a new building based on age? What other changes may occur before the start of school in the fall?

It is also a good time to start making appointments that will be needed for next year. Students in Kindergarten, 6th grade and 9th grade need a physical exam and update immunization forms. Students in Kindergarten, 2nd grade and 6th grade will need dental exams. Yearly eye exams are also beneficial as being able to see clearly impacts learning. Vision screenings are completed at school, but a full exam will help keep your student seeing the future clearly!
